INTRODUCES HIGH-PRODUCTION MOVEMENT IN COAL MINING

A new movement "Produce more today than yesterday," initiated by Arpad Loy, a Stakhanovite foreman of the Alberttelep mines, was introduced into coal mining.

The movement is based on the rationalization in mining, elimination of faulty maintenance, full utilization of mine cars, and coordination of minor operations such as posting of watchmen along the mine-car track.

Loy and his brigade performed their work under difficult conditions in the Alberttelep mines, located near Mucsony. Their first production goal was 500 carloads of coal per shift. After attaining their aim, they set their next target at 600 carloads. When the brigade has reached the production of 605 carloads, Loy designated 700 carloads as their next goal.

The innovator emphasized that the prerequisite for the success of his movement is the cooperation of the technical management of the mines.
